Subject: Revised Pages for NSG South Plant Focused Feasibility Study Report – Revision 2
Attachments: South Plant RTC FFS Rev 1 and FFS Rev 2 Submittal Letter – Revised Page 3.pdf; South Plant Focused DNAPL FS Report Rev 2 – Revised Page 33, 63, & 64.pdf

All,

The attached pdf files contain four revised pages from the North Shore Gas Waukegan South Plant Focused Feasibility Study Report – Revision 2. These pages have been updated to address USEPA comments provided via email on April 7, 2015. A summary of the revisions to these pages is as follows:

- **Response to Comments Letter, Page 3** – IBS response to USEPA Comment 8 was updated by removing the phrase “to be in full compliance with the ARARs.”
- **Focused FS Report, Page 33** – Section 4.4.4 was updated by removing the phrase “to be in full compliance with the ARARs.”
- **Focused FS Report, Page 63 and 64** – Section 5.2 was updated to correct minor grammatical issues. In addition, discussions of Alternatives D4 – D7 were updated to state that these alternatives will remove a principal threat waste to the extent practicable; however, full compliance with the chemical specific ARAR will be address in during the subsequent groundwater remedy.

These text revisions have not resulted in any changes to the pagination of the report submitted on March 30, 2015. These revised pages have been incorporated into an updated pdf version of the report, which has been uploaded to the Natural Resource Technology Sharefile site. The report can be accessed through the below hyperlink:

<https://naturalrt.sharefile.com/f/focea1c0-6ea2-4a29-af29-5977757cf8f9>

Please contact Mr. Naren Prasad of IBS at 312.240.4569 if you should have any questions or require additional information.

Thanks,
